www.thesera.com

The sooner,
the better for your scalp!

The total solution for the scalp, hair falls, and hair texture

THESERA

The scalp is your skin, too!

Now it's time to care for your scalp as it ages as your skin.

Root + Tension

Make your 'roots' strong!

Resolving complex scalp issues with 'Rootension' Total Care

[Black EX Collagen]

Scalp elasticity replenished by 8 types of black energy

[YukimijihuangHR Complex]

Potentiated ingredient for hair loss prevention and hair growth promotion

[L-menthol, Salicylic Acid, Dexpanthenol]

Functional ingredients for alleviating hair loss symptoms

STEP 01

'Scalp scaling', the beginning of a healthy scalp care

Deep cleansing, eliminating dead skin and sebum while handling scalp temperature and smell as well

Rootension Scalp Scaling Water_150ml

Apply an appropriate amount along the scalp line onto the dry scalp, then gently massage evenly. After 3-5 minutes, rinse lightly with water and shampoo (recommended once a week).

STEP 03

Intensive damaged hair care, 10-second hair mask

Hair elasticity and nutrition supply, cuticle improvement, collagen and protein care

Rootension Black EX Hair Mask_250ml

After shampooing, apply an appropriate amount to wet hair, and massage for 10 seconds. Rinse thoroughly with clean water after massage.

STEP 02

Scalp, hair, elasticity improvement; de-aging shampoo

Acidic shampoo, removal of sebum and impurities, helps with hair and scalp elasticity

Rootension Black EX Shampoo_500ml

After wetting the scalp and hair with lukewarm water, dispense an appropriate amount of shampoo, lather sufficiently, massage the scalp and hair thoroughly, and rinse with running water.

STEP 04

Scalp elasticity and follicle strengthening; de-aging ampoule

Scalp elasticity, follicle strengthening, scalp volume, scalp temperature stabilizing

Rootension Black EX Ampoule_150ml

After removing moisture with a towel after shampooing, evenly spray onto the scalp and massage with fingers to ensure absorption of nutrients. Finish with drying after ample absorption of the ampoule.
