

Big Volume

Sprayable Ampoule for Glass Skin

No. 1 in repurchase
for 9 consecutive years

THE SERA
Professional

Filling Cell Moisture Step

It supplies moisture to fill from the inside to the outside of the skin and can keep moisture in our skin for a long time.
It is Hydroglow Cell Ampoule that helps to absorb moisture in the skin.

With a salinity of 0.9 (identical to the salinity of the body fluid), it helps cells absorb moisture quickly and has a high moisture retention capacity to prevent moisture loss.

- Environment Creation
- Supplying Moisture
- Essential Salinity
- Highly-In...

200ml/6.7 fl.oz

THE SERA

Salinity 0.9 enhances moisture absorption inside the skin
